Software installation

Windows based PC

1. Insert the supplied application CD to the CD-ROM of the computer.

2. Double click the "Digital Viewer.exe" icon located within the CD.

3. Follow the Digital Viewer setup wizard to install the software and drivers for the Digital Microscope.

Mac OS based PC

1. Insert the supplied application CD to the CD-ROM of the computer.

2. Double click the "Digital Viewer.dmg" icon located within the CD.

3. Drag the Digital Viewer icon into the Applications folder.
Getting started

Assembling the product

Insert one of the adaptors into the adaptor slot, and fasten it by turning it gently in the clockwise direction.

Connecting the device

Connect the device to a USB socket of the computer.
Starting the Digital Viewer software

Windows based PC

The Digital Viewer software can be launched by double clicking the Digital Viewer icon from the desktop, or from the start menu (Start > All Programs > Digital Viewer > Digital Viewer).

Mac OS based PC

The Digital Viewer software can be launched by double clicking the Digital Viewer icon from the Applications menu.
Focusing

Adjust the focus of the image manually by rotating the focusing ring.
Using the Digital Viewer software

The following buttons are available:

| ![Gear icon] | Clicking this will open the **system settings** menu (see next section). |
| ![Camera icon] | Clicking this will **capture** the on screen image of the device. |
| ![Clock icon] | Clicking this will activate or deactivate the **timed shot** feature. When activated, images will be captured at a regular interval. |
| ![Question Mark icon] | Clicking this will activate or deactivate the **video recording** feature. |
| ![Power icon] | Clicking this will show the copyright and version **information** of the application software. |
| ![Stop icon] | Clicking this will **shut down** the application software. |
System settings menu

The first time the Digital Viewer is opened, the default settings will be loaded, you may change these settings manually in the system settings menu.
Device setup
If the image captured by the Digital Microscope was not displayed by default, you can change this by selecting it from the "Device" drop-down menu.

The resolution of images you capture can be changed from the "Resolution" drop-down menu.

Timed shot setup
The frequency and duration of automatic images capture can be adjusted under this option.

Movie setup
The resolution of videos you record can be changed from the "Resolution" menu. You can also set a maximum file size for each video.

Save setting
The default location for captured images or videos can be changed under this option.
Language setting

The language of the Digital Viewer software can be changed under this option.

Advanced settings

By clicking the "More..." button on the right of the system settings menu, you will be able to manually adjust all of the image settings. Note that the settings available may be different, depending on your operating system.
Saved files

With the Digital Viewer application software opened, you can locate the saved files folder by clicking the "More..." button located on the left of the main software window.

Full screen

To activate the full screen mode, click the full screen button located on the bottom right hand corner of the Digital Viewer application software window.

To exit full screen mode, either double click on the screen, or press the "Esc" button on the keyboard.
Uninstalling the Digital Viewer software

Windows based PC
Select "Uninstall Digital Viewer" from the start menu (Start > All Programs > Digital Viewer > Uninstall Digital Viewer).

Mac OS based PC
Drag the Digital Viewer application icon from the "Applications" folder to "Trash".
Care and maintenance

- Keep the device dry and protect it from water or vapour.
- Do not leave your device in a place with an extreme high or low temperature.
- Do not touch the device with a wet hand as it may damage the device, or cause an electric shock to the user.
- Do not use or store the device in dusty, dirty areas as its moving parts may be damaged.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the device. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

Warning

- Do not shine the Digital Microscope’s LEDs in the eye, doing so may cause permanent eye damage.
Do not attempt to open or dismantle the Digital Microscope.
